

Submitter: Tenille Woodward

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I believe a pause on the DEQ ACT Rule is needed to give time for the technology and infrastructure required to support Class 7 and 8 Zero Emissions Vehicles to be put into place. A transition without available alternatives could disrupt essential operations across many industries. Oregon businesses need practical, cost-effective solutions before major regulatory changes take effect. Thank you.
