

Submitter: Liz Cawood

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

Since the technology and infrastructure do not exist to support Class 7 and 8 Zero Emission Vehicles, I ask to you to pass this bill. Banning the sales of diesel work trucks, tractor trucks, etc. will make it difficult to transport goods, fuel and critical materials, resulting in supply chain disruptions. Plus, emissions from older, less efficient diesel trucks could contribute to delaying Oregon's emission reduction goals. Thank you for passing this measure.
