

Submitter: Deanne Ford

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I am a common person who is right now trying to deal with food costs already out of control. The Advanced Clean Trucks regulations will most likely at least double the current cost of groceries for me. If the trucking industry will need two clean trucks and therefore two drivers to haul the same as one diesel truck, one only needs to do the math to know what the result would be. Consumer prices going through the roof. Please vote yes on HB 3119 to bring some common sense to the Advanced Clean Truck regulations.
