

Submitter: Rick Robinson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I am in the transportation and excavation fields. I support Shelly Boshart bill to delay action on advanced clean trucks. We have industry's like farming, ranching, logging,excavation, road building that will not be able to operate with the technology that is out there for zero emissions. It will change the way that these businesses have to operate and add huge expenses to their operations. This will add high cost to all the things that everyone in this state will have to pay the higher cost, those costs will make products from Oregon too costly to be competitive in any market. Please think about all the people this will hurt, including seniors on fixed incomes that will not be able to afford the things they need, food, fuel, materials for home repairs, and their homes that some have lived in for decades. Please think about this and support Bosharts bill. It is becoming too expensive for people who have lived here most if not all of their lives and this will be the final nail that does them in.
