

Submitter: Antonio Smith

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3119

I'm voting against, people don't understand not everyone can afford EVs, they also can't handle the same work load as a traditional gas or diesel engine, with having to stop and charge it'll slow down production and movement of goods, which will result in mass shortages and in some locations like eastern Oregon in the winter it'll leave small communities with out the basic needs to survive.
