

Submitter: Sirrus Lawson

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB2557

Octopuses are sensitive intelligent animals, who feel pain just like our own animal companions. There are so many ways we can take action to offset climate change and the environmentally destructive nature of animal farming, like growing and eating more fruits, vegetables and grains, rather than engaging in the exploitation of even more animals than we already do, and so I would like to urge the legislature to support HB 2557 to protect these sea animals
