

Submitter: Donna Bleiler

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB828

I oppose SB 828, because it has no accountability.

This bill essentially takes advantage of a Biden grant program. It creates a pot of money for the Governor to fund more wind and solar farms, or install more government run charging stations, or develop technology to spy on us through the smart meters we have on our houses. It gives her another avenue to fight the Trump Administration to further her intent to shut down fossil fuel use in Oregon. All of which will not benefit Oregonians. The bill gives no limitation for its use.
