I am writing in support of SB 933 for a more transparent, fair and successful education system in Oregon. Oregon is ranked at that bottom of the pile in the most recently released NAEP scores and that is clearly in part because the state simply does not track and publish data related to the achievement of our most capable students, which sends a very clear message to the districts that those students' needs don't matter. SB 933 ensures we finally have the data to hold ourselves accountable for serving an overlooked segment of our students.
