On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3170

I am in support of funding for Community Resilience Hubs HB 3170. I worked as the Agency Relations person for FOOD for Lane County for 8 years overseeing Lane County's Food pantries and meal sites. I know that with extreme weather becoming more frequent and likely, it is imperative that we have more Resilience Hubs as refuges for people particularly in our rural communities. As I visited all of our pantries regularly I was able to see both the need of many people in these communities and the dedicated volunteers who made them run smoothly. Please pass HB 3170 to protect these important communities in times of need. Thank you for taking my testimony.
