

Submitter: Cheryl Lohrmann

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3170

I know that in my lifetime and the lifetime of all the youth I know, and don't yet know, we will all need to receive aid for a disaster. Given the current circumstances in LA, and as the Earth temperatures on average have been setting records since 2023. The smoke events in 2023 during the pandemic were a reality check for my family in Portland Oregon. Cooped up inside avoiding contact with others because of Covid, also the smoke keeping us from going outside at all in addition to rioting in the city was a triple reality check. Now we are back under the same administration that will perpetuate all these events rather than solve their root causes. Resilience is a intelligence.
