

Submitter: Jenny Andrews

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB3170

I support HB3130 to protect Oregon communities from the increased risk of climate-related disasters. We need to invest in resilience hubs to create trusted spaces we can rely on before disaster happens. These Community hubs should build resiliency not just in emergencies but every day, with supports that communities design from the ground up.
