Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3170

I live in forested hills and every summer my neighbors and I are scared of fire. We have GO bags packed and constantly check the weather and fire warning apps. I don't know where we would go or who would help if we had to start over with what is in a duffle bag. It would be comforting to know there were people and provisions available should our neighborhood burn, especially now that FEMA funding is likely to be withheld by this administration.
