

Submitter: Enzo Viarengo

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3231

This bill seems like a modest and necessary step to modernizing our transportation network and meeting environmental goals. I'm actually a bit surprised to learn that our passenger rail plans don't already "include ways to fix and improve train tracks and other important parts." We will certainly need to update our passenger rail system in the coming years, and with the additional information that we gather by enacting this bill, we will be able to better able to navigate those decisions.
