On Behalf Of:
Committee: Senate Committee On Natural Resources and
Wildfire
Measure, Appointment or Topic: SB747

I strongly oppose this rule. There is enough burdensome regulation on agriculture as it is. This is just another layer of regulation that is going to cause more costs to the farmer or rancher that will have to be passed on to the consumer. Farmers and Ranchers are already burdened with monitoring the amount of fertilizer that is being produced on their farms. Ground water is not being affected by Farmer's or Rancher's practices. If your goal is to end agriculture in this state keep passing regulations like this and you will see agriculture leave this state and move to a state where their hard work is appreciated and encouraged. Your small scale farmer cannot supply the needs of the state and keep the price of food cheap.
