

Submitter: Mary Addams
On Behalf Of: SB747
Committee: Senate Committee On Natural Resources and
Wildfire
Measure, Appointment or
Topic: SB747

Dear Senator Prozanski,
Please support SB747 which helps protect our waters from fertilizer runoff. Fertilizer runoff is a major cause of pollution and algae blooms. Our planet has become dangerously polluted from a variety of sources: pesticides, fertilizers, plastics, toxic metals, fires, fossil fuel burning, the meat and dairy industries, etc. I have a 4 year old granddaughter and I fear for her future. At the rate we're going, the planet won't be able to sustain human life, as well as most other species.

Please do everything you can to preserve our planet's eco-systems!
Mary Addams
