

Dear Senators and Representatives,

I have been an Independent Pharmacy owner for 36 years. The **continued existence** of serving our community's healthcare needs **depends on your support** for fairness and transparency. I am writing to express my strong support for House Bill 3212, which proposes essential reforms to the regulation of Pharmacy Benefit Managers (PBMs) in our state. I urge you to **vote "yes"** on this bill to promote fairness, transparency, and improved healthcare outcomes for our patients. This has gone on far too long.

DIR fees, Clawbacks, Formulary exclusions, Gag clauses, Deceptive marketing, Scare tactics, and Spread Pricing are just a few of the PBM's unethical practices. The lack of regulation and enforcement has created a trillion dollar industry that increases healthcare costs and puts Independent pharmacies out of business.

PBM reform in other States (Ohio, Tennessee, Arkansas, Texas, Michigan, Maine to name a few) have shown significant savings in their Medicaid programs.

We must **act now** to bring transparency to PBM operations and ensure that **patients—not corporate profits—remain at the center of our healthcare system**. Oregon has the second-worst patient access to pharmacies in the country, trailing only Alaska. Community pharmacies are closing at an alarming rate—not because they are thriving, but because they are being driven out of business by the predatory practices of PBMs.

HB 3212 introduces several critical provisions including:

- **Ensuring Fair Reimbursement:** The bill mandates that PBMs provide equitable reimbursement rates to pharmacies, preventing practices that could jeopardize the financial viability of local pharmacies and, consequently, limit patient access to essential medications.
- **Transparency in Drug Pricing:** By requiring PBMs to disclose the sources used to determine maximum allowable costs and to update these lists regularly, the bill promotes transparency, allowing pharmacies to make informed decisions and better serve their patients.
- **Prohibition of Unfair Practices:** HB 3212 prohibits PBMs from reimbursing pharmacies differently and from mandating that beneficiaries fill prescriptions exclusively at network pharmacies. This ensures patient freedom to choose their pharmacy and supports the sustainability of various pharmacy models.

These reforms are vital for maintaining the integrity of Oregon's healthcare system. They ensure that pharmacies can continue to provide accessible, affordable, and high-quality care to our communities.

I respectfully request your support for HB 3212 and the other PBM bills this session (HB 2149, HB 2252, HB 2253, HB 3226, HB 3223). Your affirmative vote will contribute to a more transparent and equitable healthcare environment in Oregon.

Thank you for your consideration.

Sincerely,

Jamie and Melissa Netland, RPH's

Stayton Pharmacy
