

Submitter: Kevin Westfall

On Behalf Of:

Committee: Senate Committee On Natural Resources and
Wildfire

Measure, Appointment or
Topic: SB747

Please oppose SB 747. This bill is a solution looking for a problem. There is a lot of science behind how much and what kinds of fertilizer that producers use. Different crops and soil types use different kinds and amounts. Fertilizer is one of the most expensive inputs that we buy and it would be very costly for us to put too much on when our crops can't use it to grow. The committee and bill sponsors should spend some time educating themselves about how fertilizer is used before enacting regulations that serve no purpose. Thanks for the opportunity to provide testimony.
