SB385

I read the proposed legislation and it looks good. However I don't think it goes far enough. It should be retroactive to those who lied to frame me and others. I am an uncompensated exoneree who tried to file charges on those who lied to facilitate my enslavement and was ignored by police and the DA. My accuser is a rapist and was never prosecuted. He also had the victim in my case in his physical custody when they were abused. I'm sure that the fact that his dad was a cop and his mom's fosterhome rape ring was supported by Neil Goldschmidt had nothing to do with the decision not to charge him. Could it be a major flaw in the system when a cops wife sat on the citizens review board that tossed my complaints? Too bad because the cop that framed me went on to frame others. Look up Craig Stolk. He should be imprisoned for kidnapping innocent people but qualified immunity protects him. I've been trying to get justice for 35 years and all I get is ptsd triggers and hollow promises. I've seen my therapist cry because their reports are not acted on. The victim in my case just recently found out that I was exonerated exonerated and the facts about her father. Please make it so the DA can't ignore it when an exonerated person files charges on their accuser.

Thank you.
