

Submitter:

On Behalf Of:

Committee:

House Committee On Agriculture, Land Use, Natural  
Resources, and Water

Measure, Appointment or Topic: HB3173

I have used Oregonflora as a tool and resource to identify local native and invasive plants for well over 2 years now. This is an invaluable resource for communities across the state to increase home value for both the homeowner and its ecosystem it exists in. It is also used by many to learn how to mitigate and or stop the spread of wildfires in our state through ecologically responsible garden and land management practices that are backed by some of our states most well renowned schools and scientists.
