

Submitter: Joni Zimmerman

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3231

I support all legislation that moves us as quickly as possible towards having a comprehensive public transportation system both nationally and throughout our state and region, connecting not only the cities, but the rural communities. Funding should be moved away from roads and directed towards public transportation, especially trains. Individual passenger cars traveling on roads is not sustainable or affordable environmentally or practically.
