

Submitter: Brian Crook
On Behalf Of: Caris Pharmacy
Committee: House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic: HB3212

Dear Legislator,

As a dedicated pharmacist serving the people of Oregon, I am writing to express my strong support for House Bill 3212, which proposes essential reforms to the regulation of Pharmacy Benefit Managers (PBMs) in our state. I urge you to vote "yes" on this bill to promote fairness, transparency, and improved healthcare outcomes for our patients.

HB3212 2025 Regular Session - Oregon Legislative Information System

We must act now to bring transparency to PBM operations and ensure that patients—not corporate profits—remain at the center of our healthcare system. Oregon has the second-worst patient access to pharmacies in the country, trailing only Alaska. Community pharmacies are closing at an alarming rate—not because they are thriving, but because they are being driven out of business by the predatory practices of PBMs.

My business partners and I opened 2 rural pharmacies, Caris Pharmacy, in Junction City and Veneta to help make sure these communities had access to a pharmacy. This was critical after the closure of the Bi-Mart pharmacies left these communities underserved. To be able to continue serve these communities PBM reform is imperative. Without adequate reform and proper reimbursement pharmacies like ours will continue to close and leave Oregonians with limited access to necessary pharmacy services.

HB 3212 introduces several critical provisions including:

Ensuring Fair Reimbursement: The bill mandates that PBMs provide equitable reimbursement rates to pharmacies, preventing practices that could jeopardize the financial viability of local pharmacies and, consequently, limit patient access to essential medications.

Transparency in Drug Pricing: By requiring PBMs to disclose the sources used to determine maximum allowable costs and to update these lists regularly, the bill promotes transparency, allowing pharmacies to make informed decisions and better serve their patients.

Prohibition of Unfair Practices: HB 3212 prohibits PBMs from reimbursing pharmacies differently and from mandating that beneficiaries fill prescriptions exclusively at network pharmacies. This ensures patient freedom to choose their pharmacy and supports the sustainability of various pharmacy models.

These reforms are vital for maintaining the integrity of Oregon's healthcare system.

They ensure that pharmacies can continue to provide accessible, affordable, and high-quality care to our communities.

I respectfully request your support for HB 3212 and the other PBM bills this session (HB 2149, HB 2252, HB 2253, HB 3226, HB 3223). Your affirmative vote will contribute to a more transparent and equitable healthcare environment in Oregon.

Thank you for your consideration.

Sincerely,
Brian Crook, RPh, MBA
President, Caris Pharmacy
