

Submitter: Hillary Williams
On Behalf Of: Think Wild
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2980

My support for HB 2980 is immense. Oregon is home to spectacular wildlife and being close to nature is what I personally value most. Living in Bend, I have witnessed tragic consequences for the influx of people moving here, mainly with regard to traffic and loss of habitat. Quite frankly, it has become traumatic. Several times I have accessed Think Wild and their amazing staff. Domestic cats are another major problem here. I have relied on Think Wild's assistance twice myself. It is every human's personal responsibility to take care of wildlife and that cannot be done without supporting Oregon wildlife rehabilitation centers, coexistence biologists and a statewide wildlife stewardship education campaign. A massive YES for this, please!
