

Submitter: inga fisher williams

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB2961

HB 2961 is timely and prudent to plan for future EV volume and add EV charging stations in multifamily buildings at the time of construction as retrofits later are costly, cumbersome and a complex undertaking. If my condo complex had EV charging stations when I needed to replace my 22 year old car, I would have bought at least a hybrid.

I urge your yes vote on this bill
