

Submitter: Mark Puhlman
On Behalf Of: MCAT and LOSN
Committee: House Committee On Climate, Energy, and
Environment
Measure, Appointment or
Topic: HB2961

Dear Committee:

50 % of the population of Oregon lives in multi-family dwellings, and the Governor is pressing for more density. They do not have a way to charge an EV at this time. We simply ask that new multi-family dwellings have EV charging stations required for parking. We are doing everything we can to encourage the population to go electric, but we are not giving them a way to charge their EV.

Pass this common-sense legislation.

Thank you
Dr. Mark Puhlman DNP
