

Submitter: David Wall
On Behalf Of: Mr Oregon OPPOSES HB 3171
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB3171

I OPPOSE [HB 3171].

[HB 3171] is more concerned with building infrastructure in rural Oregon to facilitate and support residential housing growth thereby destroying valuable, irreplaceable farmlands and or forested areas.

[HB 3171] will require significant funding sources yet to be identified and quantified.

[HB 3171] incorporates the socialist-Woke agenda as seen in the following exert from the TEXT:

"...(6) In developing an energy resilience plan under this section, a county shall:
(a) Engage with local environmental justice communities to help the county identify potential locations for community resilience centers and select other critical public services facilities to be included in the county's energy resilience plan;
(b) Use the locations of communities that experience social vulnerabilities to prioritize the potential locations of community resilience centers to be identified in the county's energy resilience plan;
(c) Consider the needs of communities that experience social vulnerabilities to identify the critical public services facilities to be identified in the county's energy resilience plan; and
(d) Take into consideration natural hazard risks and risk mitigation measures when identifying potential locations for community resilience centers and selecting other critical public services facilities to be included in a county's energy resilience plan..."

David S. Wall

Mr. Oregon Concurr, "Oregon needs more cogeneration plants, deep-water ports for LNG Facilities and above all-NO more residential housing. Oregon needs to Pull in the Welcome Mat."
