

Submitter: Darin Henry

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB2961

Dear House Committee on Climate, Energy and Environment,

I'm a founding member of Oregon Educators for Climate Education, OECE and I fully support HB 2961 because it is a practical mitigation strategy that will help Oregonians transition to renewable energy. Oregon's transition will immediately help Oregon clean energy startups like the Lake County Resource Initiative in Eastern Oregon. It is the duty of those who can to go full throttle with clean energy because every hesitation puts our grandchildren and theirs in harms way.

Thank you for your wise, courageous and forward thinking leadership.

Sincerely,

Darin G. Henry
Oregon Educators for Climate Education
