

Submitter: Donna Maebori

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or Topic: HB2961

HB 2961 applies to new buildings, ensuring 20 – 50% of parking spaces, depending on the building, come equipped with EV chargers. This rule would support the need to supply enough EV charging stations for future need. Oregon will need sufficient electrical generation to support more charging stations. But we seem to supply electricity to hungry data centers with no debate. Perhaps the same should apply to EV charging stations.
