

Submitter: Elizabeth Goy

On Behalf Of:

Committee: House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic: HB2961

I am concerned for the future world environment of our coming generations. Electrification of a large portion of transportation is an important step towards reducing carbon transmissions. 40% of Oregonians are renters and lack of charging in multifamily settings is a barrier to the electric vehicle transition. Please have the courage to support proactive changes such as this Bill.
