

Submitter:	Christopher Tobias
On Behalf Of:	my daughter
Committee:	Senate Committee On Human Services
Measure, Appointment or Topic:	SB20

My daughter is severely developmentally delayed due to a rare genetic issue. While she requires a variety of medical services, she is also highly social and loves to make a contribution to a group. She is excited about working and being part of a team that helps people. Not only do we believe she can be a contributing part of a work environment but working will also greatly help her to continue growing intellectually and socially. We should not have to choose between her needed medical supports or her being a valued member of a work team, especially when working will help her be active and healthy. Please pass SB 20. Thank you.
