

Submitter: John Livingston

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB685

Our world is at an energy crisis The public needs to know when utilities are changing their sources or mix of electricity or natural gas. Gas utilities must have regulations that require notice to the public when planning to blend hydrogen with methane gas being piped into homes. Currently this regulatory gap poses significant risks for ratepayers, public safety, and environmental health. SB 685 requires utilities to notify communities and the Oregon Public Utilities Commission of hydrogen blending projects. Please vote yes on this bill.
