

Submitter: Jeff Amundson

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

Please consider this it would be so much safer to be able to connect trail rides by way of a county road rather than staging in remote areas and have your rig broken into when you are on a trail . Being able to get into a small community for food fuel and lodging , having this across our state wide would make it so much better to plan a vacation in more areas of our state . We support this bill and strongly feel it would be a great help with tourism for many of our small towns across the state .
