

Submitter: Ron Few
On Behalf Of: Thousands of citizens
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3155

Why would this nor why has this not been allowed? What is the voice of reason to oppose this ?

People who operate these vehicles are the same people already driving on “legal” roads so why should it be any different? Again, what is the voice of reason? If the vehicle meets street legal requirements what more should be asked? Opposition to allowing this seems to have no basis or legal sense if requirements are met. The UTV industry is huge involving many families and generations. The revenue from every aspect of this sport is phenomenal: not only the UTV and all the accessories people buy but the revenue from the vehicle that is driven to get the UTV to its destination. Fuel, maintenance, tires, oil changes, insurance....and it evolves into a lot of dollars supporting a lot of business. Let us travel the roads, don't restrict this...and again, for what reason??

Please let us travel to our destinations, giving us the choice of the road or the trails. That destination by road could also be creating a financial boost to a little restaurant that a family is running, a fuel station, a gift shop where we can buy treasures or we need a new sweatshirt at the local general store.....places we could not reach if we couldn't travel the roads. Expand your horizons and let us UTV people expand ours and venture along a new road traveled.
