

To: The Oregon State Senate Legislature

From: Eddy James Antonello

Regarding Senate bill: SB 159

I feel that not only Veterans exclusively should have the option to receive their own license plates, but also those with disabilities such as myself, should also have the option to a personalized Oregon DMV License plate in a specific unique design to Represent those with Disabilities just like with DMV license plates that Represent Veterans. I feel there should be Moped/Motorcycle Oregon DMV Plates Offered to both Veterans, and Individuals with Disabilities who Request such DMV Moped/Motorcycle Specific license plates. I have created a mockup design image of a potential new license plate design for disabled individuals to propose to the Oregon Senate for consideration and support of both the new license plate design as well as the Veterans based DMV Moped and motorcycle license plates.
