RE: Support for SB 916

To the Senate Committee On Labor and Business,

I feel strongly that unemployment benefits for striking workers gives them more flexibility to continue to strike and alleviates the financial burden placed upon from missing work. Without this, large corporations know that they can wait out striking workers until they have no choice but to cross the picket line and accept a poor contract.

Thank you for accepting my testimony and I look forward to your support.
Matthew Judd RN
