

Submitter: Keith Sorensen

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

I believe this would be a great thing to be able to drive my sxs across town on a nice day to run to the store or in area where I can ride to the off road area I do agree that riding on a interstate would not be safe possibly exceptions when short distances to road that will lead to mt roads this would greatly I love to go drive around in the hills and take in the sites but it's hard to when I have to load up and trailer it just to do gravel road driving it's ok when I go hrs from home to the dunes but if I could just drive the 15 min to the mt would greatly increase the usability and family's enjoyment also the money the state could use from the dmv fees they would gain from all the utv regulations
