

Submitter: ELIZABETH MULCAHY

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB685

I really don't want this happening in SE Portland or anywhere but historically outer SE Portland has been undeserved so it's hard not to look at this as environmental classism and racism.

We are tired of these constant upgrades from utility companies that the already overburdened citizens didn't ask for but have to pay while the shareholders get wealthier.

Needing heat is a human right. This company is profiting off of a human need that cannot be avoided. This company ought to be publicly owned. If they are proposing to do unasked for costly upgrades it shows the money grab contempt they have for their customers.
