

Submitter: GEORGE RIGGS

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

While driving an SxS on public roads can be practical and beneficial in many cases, it would require thoughtful regulation, proper vehicle modifications, and safety measures. It could make life easier for those in rural areas or off-road enthusiasts, while also boosting local economies through tourism and recreation. However, it's essential that the integration of these vehicles into public roadways is done in a way that prioritizes safety and minimizes risks.
