

Submitter: Kevin Casey

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

I live in an area in North Bend, where OHV vehicles are already allowed on certain roads, and it has not been a problem. I could find this to be very beneficial around town as a means of transportation in the summer that would be enjoyable and safe. As long as people follow the laws of the road I don't see any reason why this would be a negative. As stated before, it has not been a problem down in the Hauser area where I live. Thank you for your consideration.
