On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3155

I am in support of this. There are a lot of places I go where I do not like to leave my rig that I tow my side-by-side with due to the break-ins and vandalism our vehicles receive that being said I have quite a few places where I can park my tow rig and trailer Then I have to travel a few miles down the road in the side-by-side to get to the area where we will be riding and enjoying our day. I also use my side-by-side on my ranch. It would be nice to use roads to run into town and get fuel for tractors And or simply get a fertilizer spreader that we tow behind the side-by-side for fertilizing our pastures. If side-by-side's are equipped with the proper devices as per vehicles, there should be no reason why this is not supported a lot of us have full coverage insurance on our machines as we are asked when we do ensure them if we want to cover vehicles on the highway and it's only a few dollars more a month
