

Submitter: Danae Levin

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

Side by sides have proven to be a part of our future. They are built safer than many cars. We allow motorcycles and other vehicles that are not at all designed with this level of safety and structure.

Allowing side by sides benefits the state with additional revenue as well as bringing many to our beautiful state by creating adventures that are family friendly and focused on enjoying this amazing area around us. Much like Arizona, Utah and Idaho have done before us, proving that this focus and revenue has multiple benefits.
