

Submitter: Koltyn Kenworthy

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

As an Oregon resident this has always been a luxury our neighboring states get to enjoy. It would not only provide another form of transportation for the state but allow for potentially better economic alternatives to traditional cars. Motorcycles average nearly 50 miles to the gallon especially when geared towards on road use. This alternative form of transportation can also incentivize people moving into the state and or not moving out.
