

Submitter: Robert Keady Jr

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

We support this measure as builders of UTV's in the Salem area. We would invite any committee member who oppose these machines being on the roads and would like to learn more about these machines and their safety features, capabilities, and limitations to please reach out and we would love to host you at our shop to help answer questions.

We feel these machines are much safer then a lot of vehicles that are out there on the roads today. The revenue from the licensing could be used in a variety of ways as well. We also feel that each machine should have to have turn signals, wipers (w/windshield), minimum 4 point harnesses.

The revenue stream this could create excites us as a business in the industry as well as a revenue stream for the state/counties. The thought of these machines for day to day use would give us the same rights as a motorcycle owner (minus the interstate travel) and we could see a lot more peeled join our love of these machines. It's an exciting opportunity and we fully support UTV's being allowed to drive on public roads.

Thank you
