

To whom it may concern,

I am writing in support of the bill allowing a person to legally drive class 1, 3 & 4 on the road. Many states are already allowing these vehicles and our state should follow. It could be a great revenue generator for our DMV by allowing a whole set of new vehicles to be plated and registered. The state could charge a good amount for these. People would not have these as their only mode of transportation, so it would just be a bonus of revenue yearly to our state.

Please consider passing this bill.

Thank you,
Brant Proden
