Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

We should be able to drive out modern utv through town. They are 30-60k cars that in alot of cases are way safer than vehicles that are on the road today. Vehicles such as ones from "archimoto" are street legal and the 3 wheel machines that are basically a street side by side drive everywhere. Our cars car full safety harness, bucket seats, 4 wheels/tires and have better handling characteristics than most older vehicles on tue road. I spent over 33k on our 2022 can am x3 and it would be nice to be able to use it as a second vehicle rather than have to be towed everywhere. Driving it to work and around town would eliminate a need for a 3rd car. I don't see why we cannot drive these cars on the road with the proper street legal items. Please for the thousand of people in oregon that would like to daily drive there cars on the road lets make this happen. Arizona, Washington, Idaho, Nevada, utah all have made it legal and most are surrounding states.
