

Submitter: Aaron Wise
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3155

I am in Support for the use of OHV vehicles on public roadways. Those of us in the rural areas of Oregon would appreciate this tremendously. One of the biggest concerns we face is when going out into the woods and parking our vehicles and trailers to unload often times we come back to trailers being stolen, vehicles vandalized, fuels cans, tools, tie downs or any other personal belongings being stolen from our vehicles we had to leave.

It is legal already in other states to drive the UHVS on the roads. Most UHVs do not have a problem traveling at highway speeds.

I would even support the if we had to license our UHVs for the, which in turn would create more revenue for the state for a minima amount of road maintenance they would create.

Please consider allowing Oregon to use UHVs on the public roads. Even if it's only the rural areas and not the metro area.

Thank you
Aaron Wise
