Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB2232

We have had our place here on Sandlake Road for 37 years. We are 4 miles by road and 2 miles as a crow flies from the ATV Recreational area..

There are times I walk the beach and the ocean is drowned out by the drone of the ATVs at Sandlake. I often wonder how the nesting birds tolerate the overwhelming pulsating noise. Kind of ironic that no motorized vehicle is allowed there or across the inlet. The sound that is carried to the nesting site from the nearby dune is much more horrendous.

The pulsating, vibrating, whirling noise carries onto our deck in the evening and into our bedroom at night. I support HB2232 to restore a healthy encounter for the people and the wildlife.
