

Submitter: Adrina Sherman Sherman

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

In support of allowing Utv/sxs access to public roads. This will allow people who use them for farm and ranch work to hop between spaces without loading on a trailer first, increasing efficiency. Also for trail enthusiasts this will allow them to access trails that would require them to load up to ride 1/2 mile away on a different trail system. Additionally in the case of an emergency due to main roads being inaccessible, the rider can use their utv to get to a safer location using a path inaccessible by a traditional truck or car.
