

Submitter: Ricardo Mendoza

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

Due to the efficiency of fuel and how all terrain vehicle have more easy access to different roads. In case of an emergency they can be really reliable. If they were to be legal it would benefit users by saving gas and not having to haul big trailers. Although some people might not agree on having them on the road, most people would not ride them for fun on the streets in my personal opinion it would even benefit some cities that have a lot of tourist.
