

Submitter: Lucas Jansen

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3155

My name is lucas jansen I have grown up riding birtbikea and quads in oregon, I have family members in Idaho where you can ride your atvs on the roadways, from riding on the roads and the trails you can see that the roads are cleaner and better maintained. The better maintained the roadways are the better we look as a stare and it can help the emergency services from getting to a place like if there is a fire the roads will be cleaner to where the fireman can get to the fire and get if extinguished faster and easier. The atv community wants to be able to stay on the roadways and the trails so they are going to pick up garbage they see on the side of the trails and the roadside. I think that being about to keep the trails open and being able to drive on the roads it will be better for the community better for the emergency services in emergency. It will just be better all over the board.
