

Submitter: Carol and Daniel Griffith
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB2232

As longtime residents of the Sandlake area, we are in support of House Bill 2232. The excessive engine noise from the Sandlake Recreation Area intrudes on many of our outdoor activities and even interrupts us indoors, especially during the summer when we may have windows open. We realize it's a small number of Off Highway Vehicle operators who intentionally exceed the noise level of current regulations with their constant deafening engine revving. Our hope is that HB2232 will help make enforcement of noise levels more practical. Thank you for your consideration of this possible solution.
